SUPPLEMENT TO  
REPORT NO. 25X1X6

25X1A6a

Industrija Platnenih Izdelkov (Textile Mill) is in Jarše, approximately 60 meters west of the national highway which connects the towns of Domzale and Kamnik. Before its nationalization in 1945, this textile mill was known as the Indoplat Mill. Construction on the main building (numbered 8 on attached map) began in 1935 and was completed in 1937. At that time the mill was owned in equal partnership by KLUGE, a Czech of Sudeten German origin, and Milena BOEHM (née MAJDIC), a Yugoslav. Before the last war the plant produced canvas for army tents and linen goods, almost all of which were intended for the use of the Royal Yugoslav Army. The plant is surrounded by a barbed wire fence. There is an industrial track connecting the mill with the Jarše railroad station, but this track is used only for coal shipments from Trbovlje and Kocevje. (Coal from the latter mine is of a very inferior quality.) The mill operates in three eight-hour shifts and at present employs approximately 1,000 workers. Unskilled laborers are paid 12 Dinars per hour and skilled laborers about 16 Dinars per hour.

Electric power is supplied partly by the textile mill's own power plant and partly by the Slovene State power net.

Various unspecified linen and canvas goods are produced. Until the Cominform dispute, the Soviet Union received almost the entire output. As of 2 October 1948, production is turned over to the Slovene State Cooperative of Textile Products in Ljubljana. In April and May 1948, the mill received 80 carloads of raw material from the Soviet Union; since the Cominform dispute, however, shipments from the USSR have fallen off.

Managing Director: Engr. Jozef REBERNIK, 40 years old, member of the CP, very much disliked by his subordinates.

Political Delegate: Janez BERNOT, 28 years old, born in Jarše, a convinced Communist.

CENTRAL INTELLIGENCE AGENCY

~~SECRET~~

-2-

Chief of Personnel: Janez HRIBAR, 30 years old, born in Slatopolje, a member of the CP, and the principal UDBA agent in the plant.

Chief of Electric Installations: Stanko AMERSEK, 40 years old, politically neutral.

#### 4. Plant Identification

(The following numbers correspond to those on the attached map.)

1. Workers' billets, one-story high, stone, 8 x 9 x 10 m.
2. Workers' billets, one-story high, 12 x 9 x 10 m.
3. Garage, one-story high, stone, 30 x 8 x 10 m.
4. Guardhouse, one-story high, stone; contains billets for ~~six~~-man militia and porters.
5. Plant management and administration building, one-story high, stone, 12 x 9 x 10 m.
6. Spinning mill, one-story high, stone, 80 x 35 x 10 m., with flat concrete roof. The spinning machinery is of German origin and was purchased in 1935.
7. Boiler house, stone, 15 x 10 x 10 m. with a chimney 30 m. high; also contains storage room for coal.
8. Weaving mill, one-story high, stone, 90 x 35 x 10 m. with a flat concrete roof. This building is divided into the following sections:
  - A. Storage department for raw materials.
  - B. Storage department for finished products.
  - C. Hydro-electric power station operated with water power from the Mlinscica River.
  - D. Mechanical repair shop and carpenter shop.
  - E. Weaving department.
  - F. Pressing and sorting departments.
9. Transformer building.
10. Gymnasium and recreation room for employees, 50 x 20 x 10 m.
11. Managing director's villa, one-story, stone, 15 x 10 x 10 m. with tile roof.
